Mueller Fairing Cover Instructions

Thank you for choosing a Mueller Human-Power fairing cover to help protect your investment. This fairing cover is made in the USA of the highest quality materials for optimum protection of your fairing.

The Mueller Fairing Cover is designed to reduce fairing scratches, dust, and grime while your bike or trike is parked, and to secure your fairing safely while transporting with the fairing off.

Greenspeed GTO with body sock fairing and AC RSCO cover.

To protect the fairing while it is on the bike slip the fairing cover over the fairing edges with the shock cord at the head end of the fairing. The elastic band built into the cover will secure the cover to the fairing. If you have a fairing with a wheel slot then use cover AC STCO which has a wheel slot built into it. If you have a fairing with no wheel slot then the AC RSCO cover is the one to use.

To store the fairing off the bike remove the fairing from its mounts. This can be done by working under the cover while. Then roll the fairing starting at the foot end and use the rubber shock cord and toggle to fasten the fairing rolled.

. They have an elastic band to fasten them to the fairing while your recumbent is parked. You can also remove your fairing and roll it up. The attached elastic loop will hold your fairing rolled.

If you need any help regarding this Fairing cover please call MHP at: 1-877-267-1645

Wishing you lots of bug free smiling!
